

MORE OB QUALITY INITIATIVE

**PROJECT LEAD:
DR. SIMONE LOCH**

The core RMH MORE-OB team created and delivered two x 4 hour More OB workshops on November 2, 2023 and January 9, 2024.

They were well attended by nursing, midwife, and physician staff. During the first workshop the FH patient simulator and a laboratory manager were present to create a high yield PPH scenario.

The topics covered included Preterm labour, Hypertension in pregnancy, Postpartum hemorrhage and Labour induction. Attendees completed pre-reading, participated in didactic teaching, interactive games and hands-on skills stations.

The workshops provided a great learning opportunity and improved the cohesiveness of the RMH maternity ward team.
